

What to Expect At the Installation

It's finally installation DAY! This has to be the most exciting step in the process. For the most part all you'll need to do is relax and let our skilled technicians work their magic. There are a few small things that you can do **ahead of time** that will help us ensure your project goes as smoothly as possible.

- 1.) Please have a clear path leading to the work area.
- 2.) Move furniture back away from the installation area and covered, to help keep it clean and protected.
- 3.) Clear all breakable items (like knickknacks, collectibles and electronic devices) away from the area where the product will be installed.
- 4.) Ensure pets and young children are in a separate space, safely away from the work area.
- 5.) Your installation may require some onsite sanding to achieve a good fit. The technicians will keep this to a minimum as much as possible and they will clean the worksite before leaving. Expect the possibility of some dust remaining.
- 6.) You may notice an odor from the adhesive used during the installation; this will dissipate within a few hours.
- 7.) Don't hesitate to call with any questions that you may have.
